

## Have Chair, Won't Travel

This moron didn't know how to explain my needed involvement, so she just gave up. Most scams say something like, "am in a refugee camp", "am in my hospital deathbed", etc. to explain your needed involvement. Watch this brain-dead moron try to explain why she needs me.

Explain what you need me to do. I am not going to Spain. So if this is all about finding someone to travel for you to do this, then you need to look elsewhere.

Dear Calvin Hobbs,  
Of course your message was received and I appreciate your concerned so far towards me, Once again I thank you Mr Calvin Hobbs.  
However its NOT necessary going to Spain that matters but to contact the security company officially and seek the immediate release of the box from their custody. Its may be possible that they will agree to deliver to you on where you request to deliver depending on how you will come to agreement with them I believed.  
So I will advise you to use bellow contact to reach them officially and demand the release of the box. Whatever thing is requested do keep ne posted so that I will be following up to know when the processing is finalized.

Once again you are making no sense.

If travelling isn't an issue, what does it matter that you are in a wheelchair? If there is no need to travel, why do you contact someone that you do not know to get this box delivered to them?

Dear Calvin Hobbs,

Many thanks for your response. I wonder why you kept saying again and again that I'm making no sense. What exactly are you insinuating that you kept repeating such negative words over and over? Please do let me know if you're willing and ready to do it or that you're not interested?

Thanks as I hope to hear from you.

Ms Sikira KARIMU,

\*\*\*\*\*

You say that you want to invest money that you have.

Then you say you are in a wheelchair and cannot travel.

Then you say that travelling is not necessary.

So what is stopping you from investing the money and what do you need me for?

Do you see why this makes no sense???

I think maybe in your fictitious auto accident you may have sustained some brain damage as well. You may want to read your emails when you "write" them, because if you did then you would see that they make no sense whatsoever.

Good luck to you – you will need it.

Calvin
